

Keynote speech 16 October 2019

**Governance models for critical infrastructure resilience, an OECD approach**

# Charles Baubion

Risk Governance Expert

Public Governance Directorate of the Organisation for Economic  
Development and Cooperation, OECD (FRANCE)

Charles Baubion is a Risk Governance Expert in the Public Governance Directorate of the Organisation for Economic Development and Cooperation (OECD). Since 2012, he supports the activities of the OECD High-Level Risk Forum in areas such as resilience of critical infrastructure, science/policy interface, strategic crisis management and peer reviews of risk management policies. In this capacity, he has conducted risk governance reviews in France, the UK, Finland, Mexico and Morocco and manages the network of OECD strategic crisis managers. He also worked at the OECD Development Cooperation Directorate in 2016 as part of the peer review team. Hydrologist by training, Mr Baubion has been working previously on risk management and water resources management in China, Europe, North-Africa, and at the international level, both on public policies and at the scientific level. Before joining the OECD, he was working in the disaster risk reduction program of the World Meteorological Organisation. Mr. Baubion is a French national, he is a former alumni of Ecole Polytechnique in France and holds Master Degrees in Hydrology from Paris School of Mines and in Environment Management from Agro Paris Tech.
